

Quality Assurance

*Quality System • Quality Audit • Pre-inspection
• GCP training • Standard Operation Procedure*

LINK provides a complete set of Quality Assurance services, including Quality Audits. Our Quality Assurance personnel have several years of combined experience from Quality Assurance, Quality Control and Quality Advisor positions at health authorities, the international pharmaceutical industry and small start-up companies.

LINK offers a wide range of services for your Quality System. We can provide you with generic draft documents to be completed by your own organization, or we can produce complete quality documents based on information provided by your company.

LINK provides lectures, courses and training sessions that are tailored to the individual customer's organisation, needs and expectations.

Quality Systems

LINK's experience covers Quality Systems in pharmaceutical companies, manufacturing units, pharmacies, wholesalers, clinical sites, hospital departments, start-up companies and CROs.

- *Establishing or reviewing Quality Systems*
- *Writing or reviewing SOPs*
- *Quality and Quality System training*

Quality Revisions (Audits)

LINK has long experience in Quality Audit services and other quality activities. These are important tools for exercising surveillance, making adjustments to and generally improving your business. Our services include:

- *Formal audits*
- *Pre-audits*
- *Pre-inspections*
- *Site-audits*
- *Systems audits*

Training & lecturing

The aim of our courses is to provide understanding and practical guidance within national and international regulations. The topic, scope and duration is up to the customer to decide. Some examples of recent courses are:

- *GCP for investigators and staff*
- *GCP for sponsors*
- *Pharmacovigilance*
- *Health economics*
- *Drug development*
- *MA applications and variations*
- *Statistics for non-statisticians*
- *Clinical trial applications*
- *Quality and quality systems*
